

Supply chain management system

A better way to manage day-to-day

Today's global economy has increased pressure on companies to gain control, visibility and accessibility to their wide spread supply chains. Many progressive and competitive companies are looking to 3PL's to handle all, or a specific parts of their supply chain activities.

It is for these companies that 3PL Links has designed and launched their robust supply chain management software—3PL 360. With a growing list of 3PL vendors available, 3PL Links has set themselves apart with the launch of 3PL 360. 3PL Links' software provides industry leading functionality in a simple easy to use web portal. Whether your requirements demand weekly or monthly delivery performance reports, vendor auditing, tracking/

booking/quoting and tracing shipments or managing a warehouse locally or internationally all of this information is at your fingertips. 3PL Links understands there is a difference between the amount of data and the value of data communicated through 3PL host software. Data can be left for interpretation or data can be interpreted and displayed in a way that adds value to your day-to-day operation.

3PL 360 software is designed to support key decisions and processes within your supply chain and logistics department by providing high-value data in user friendly screens and reports to help your team manage their day-to-day operations.

ERP System Compatibility:

3PL Links has the ability to integrate with all major ERP systems.

Reporting:

3PL 360 has the ability to deliver reports that provide valuable insight into your supply chain. These reports included but aren't limited to:

- Lane way analysis
- Accrual reports
- SKU analysis
- On time delivery report

Data Storage:

All data for auditing purposes is securely stored for 7 years.

Data Security:

Data will be located at our secure data center at a Tier-1 location and can be accessed from any location in the world using most internet browsers.
